PRODUCT INFORMATION BULLETIN

TAC-SWITCH Critical Speed Switch MODEL 22-8000

BOTE APPROVAL

1207-90

DESCRIPTION

The model 22-8000 TAC-SWITCH is one in a series of critical speed switches that monitor speed and detect motion in all types of machinery and apparatus. The 22-8000 monitors speed ranges of 60 - 800 RPMs. Models are available to meet any application requirement for underspeed, overspeed or zero speed detection. The TAC-SWITCH utilizes a non-contacting proximity sensor that may be remotely located up to two miles from the control unit. Enclosed in durable ABS plastic, the socket mounted control unit conveniently mounts inside an existing electrical panel or O.E.M. control box. Ideal for conveyors, crushers, fans, motors and other rotating apparatus.

INSTALLATION

Disconnect AC power before proceeding with installation

1. Mount the TAC-SWITCH socket inside an existing control panel or other suitable protective enclosure
2. Make the following connections on the socket:

TERMINAL	CONNECTION
1	Sensor - Common (-)
2	Sensor - Positive (+)
3	No Connection
4	Earth Ground
5 - 6	120 VAC
7	Relay - N/C (1)
8	Relay - Common (1)
9	Relay - N/O (1)
10	Relay - N/C (2)
11	Relay - Common (2)
12	Relay - N/O (2)

3. Install EAGLE PROXIMITY SENSOR at roller or shaft. See sensor installation sheet.

CONTROLS AND INDICATORS

SET UP AND TESTING

Final calibration should be performed with the belt loaded and running at normal speed.

1. Turn SPEED control CCW until it stops (approximately 7 o'clock)
2. Hold switch in set position to energize relay.
3. Turn SPEED control CW slowly until CRITICAL SPEED LED stays on continuously.
4. Continue turning SPEED control until MARGIN LED begins to blink***
5. After RELAY STATUS LED is illuminated, return switch to RUN position (center)
6. A momentary TEST position is provided to simulate the loss of sensor signal which releases the control relay

*** Using the above calibration, the control relay will drop out at a machinery slow down of approximately 15% For a 20% margin, adjust the SPEED control so that the MARGIN LED just comes on steady. For a 10% margin, adjust the SPEED control CCW so that the MARGIN LED has just gone out. If a margin greater than 20% is desired, consult BWI Eagle, Inc. For ALL speed adjustments, the CRITICAL SPEED LED must stay on continuously.

TAC-SWITCH

Critical Speed Switch

MODEL 22-8000

SPECIFICATIONS

AC Input	120VAC 8W
Fuse Protected	1 amp
Speed Range	60 - 800 RPM
Relay Contacts	DPDT 5 amp @ 120VAC
Safety Delay	1 Second
Response Time	1 Second or Less
Enclosure	ABS Plastic

DIMENSIONS

REPLACEMENT AND OPTIONAL PARTS

Control Module	22-8002
Mounting Socket	22-8003
Threaded PVC Proximity Sensor	10-7139
I.S. Threaded PVC Proximity Sensor	10-7039
I.S. Zener Barrier	10-7072

TYPICAL BELT STARTER
